

Contents of issue 3 vol. XLVIII

203 PREFACE

205 P. FUNDOWICZ, J. WICHER, *Semi-empirical model of tire-pavement contact*

221 J. de PONT and B. STEVEN, *Suspension dynamics and pavement wear*

243 Z. LOZIA, *Vehicle dynamics model as road pavement load generator*

261 A. FABER and W. D. HAHN, *Effects of wide single tyres and dual tyres – a technical and economic approach – report on cost 334*

273 J. P. TALBOT, *Reduction of train-induced vibration in buildings*

283 CZ. BAJER, R. BOGACZ, SZ. IMIEŁOWSKI, *Passive control of a beam subject to travelling*

293 R. LAMMERING and M. PLENGE, *Investigations on railway tracks with special emphasis on partially unsupported sleepers due to voids*

309 A. T. DEMPSEY, D. L. KEOGH, B. JACOB, J. CARRACILLI, *The response of orthotropic steel decks to traffic loads*

329 R. BOGACZ, A. KAMŃSKI, T. KRZYŻYŃSKI, *On influence of pad features on dynamics of a railway track*
